

## ACION 8000 Series

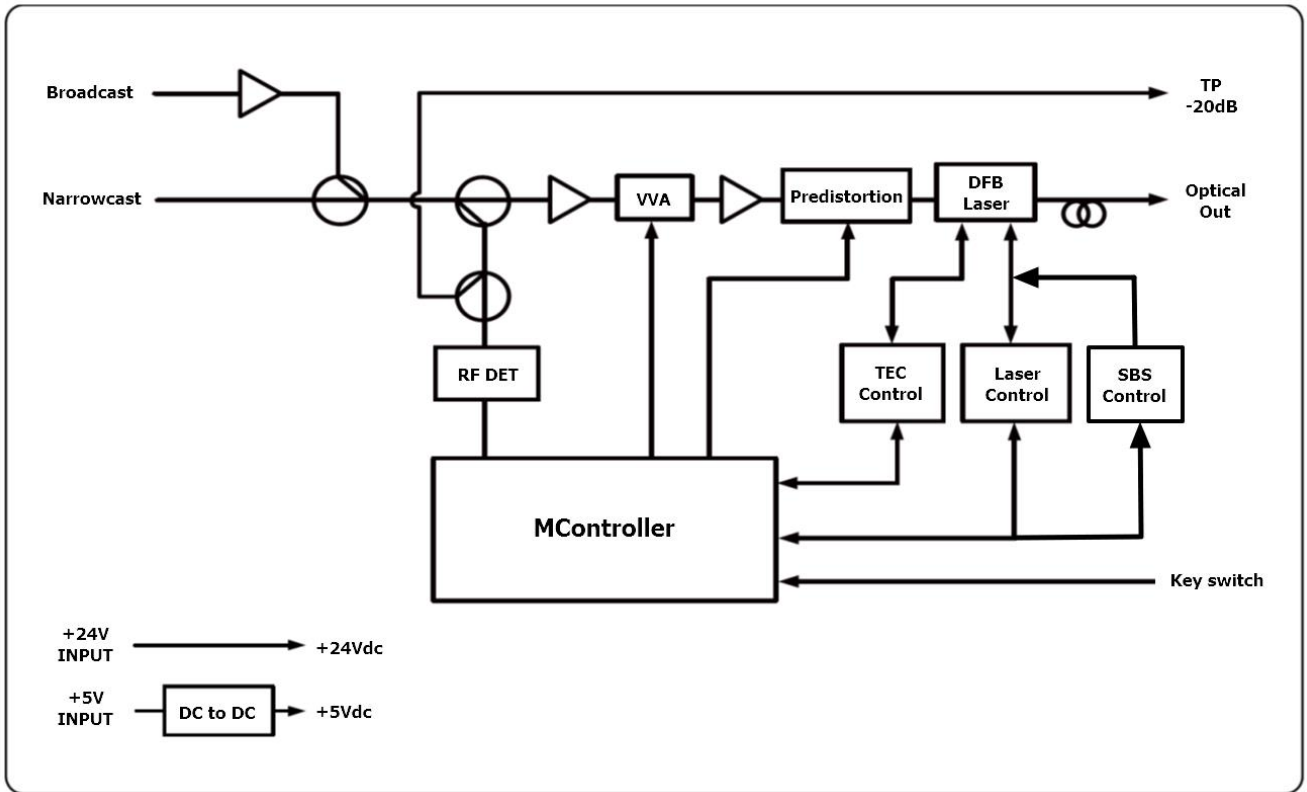

### A8KFT3 1550nm 1.2 GHz Forward Optical Transmitter

The ACION 8000 A8KFT3-1550nm is a 1.2GHz forward optical transmitter (Tx) for HFC or FTTH Applications. The A8KFT3-1550 Tx can transmit RF signals over a fiber length up to 20km. This compact and cost effective Tx module is a 3RU height and up to 12 Tx modules can be integrated in the 19-inch high-density chassis (A8KMF3). The transmitter's RF path employs several stages of RF amplification that includes single ended low noise high linear amplifiers and low noise push-pull amplifiers. The Transmitter's adjustable OMI level and user defined AGC setting features make it very versatile in field application with a wide range of RF input loading from analog loading, analog and digital loading or full digital loading.
