

LEA1 1002 MHz One or Two Output Line Extender Amplifiers

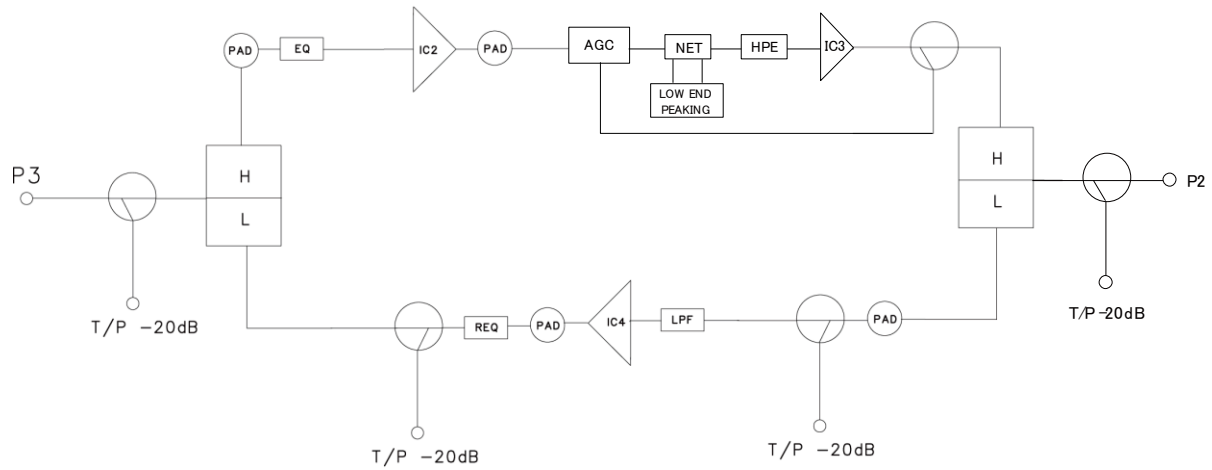

The LEA1 has a compact size, easy installation and is a cost-effective line extender amplifier. This amplifier provides high quality RF distribution for HFC (hybrid fiber coaxial) network. The AC power source provides operating power to the amplifier's active components via coaxial cable. All amplifiers support two-way operation at various standard frequency splits available.

Features

- ◆ Operating bandwidth 1002 MHz
- ◆ 40-90 VAC cable power
- ◆ -20 dB directional test points at the input and output port and after the return signal amplifier
- ◆ Pad Adjustable EQs & REQs
- ◆ Attenuator pad & equalizer guides to aid in proper insertion of plug-ins
- ◆ Two-way operation
- ◆ Gas tube surge protection
- ◆ 10 Amp power passing
- ◆ Compact size
