

SDA 1.2G

MiniFlex Super Distribution Amplifiers 1218 MHz

The ACI MiniFlex Super Distribution RF 1.2 GHz amplifiers are designed to work up to a high forward output of 57 dBmV. The return bandwidth split can be easily changed from 42 to 85 or 204 MHz with the use of field conversion kits. ACI's patented DSIM advanced technology keeps both the forward and return signals stable and reliable over extreme temperature swings. Having return band stabilization over temperature has become much more important as return band is increased to 204 MHz. Having the increased return gain of 28 dB enables these amplifiers to drop into existing designs from 750 MHz to 1 GHz.

Features

- ◆ 1218 MHz may be dropped into the 750, 870 or 1002 MHz spacing
- ◆ Easy upgrade to 85/105 or 204/258 MHz return bandwidth.
- ◆ Common housing platform
- ◆ -20.0 dB directional coupler test points
- ◆ 28 dB return gain
- ◆ RoHS Compliant
- ◆ Patented DSIM® Technology (programmable AGC)
- ◆ Increased reliability with higher surge protection
- ◆ DSIM controlled return band AGC
- ◆ Pad adjustable forward and return EQ's
- ◆ DSIM Android & Apple iOS setup applications

Block Diagrams

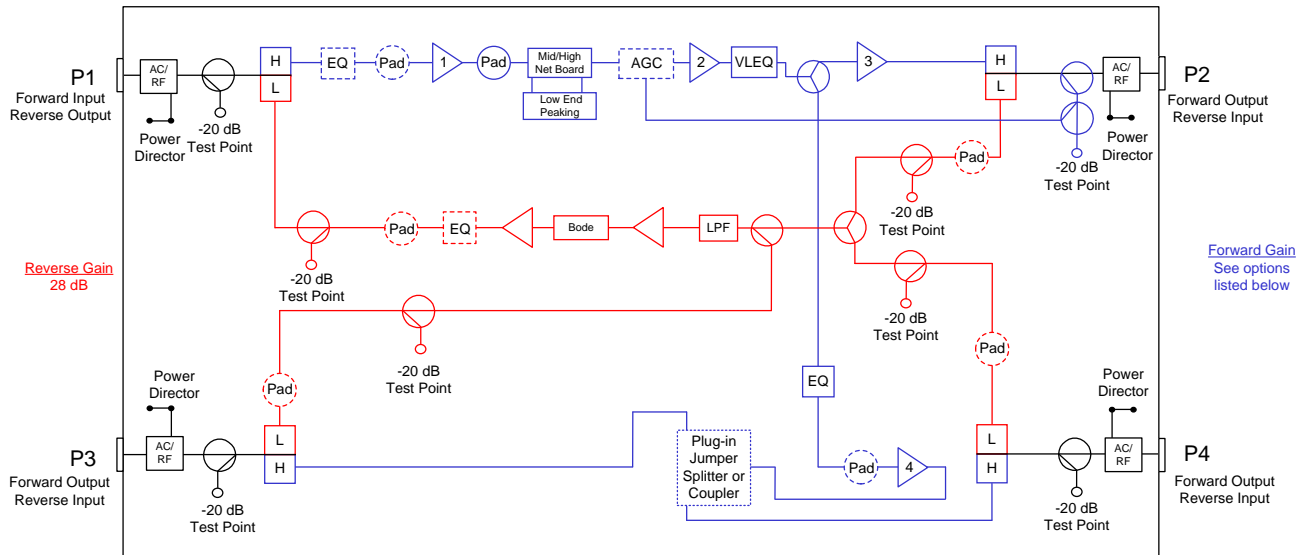

SDAT (Type 1A) 1218 MHz Amplifier Block Diagram

Note:

1. Forward gain stated at 1218 MHz with AGC. Reverse gain stated at 42, 85 or 204 MHz.

SDAM (Type 7A) 1218 MHz Amplifier Block Diagram

Notes:

1. Forward gain stated at 1218 MHz with AGC. Reverse gain stated at 42, 85 or 204 MHz.
2. Amplifiers are configured at the factory with jumper in Position #2 to have P2 & P4 active. Splitters and Couplers are sold separately.
