

N5069 Optical Node

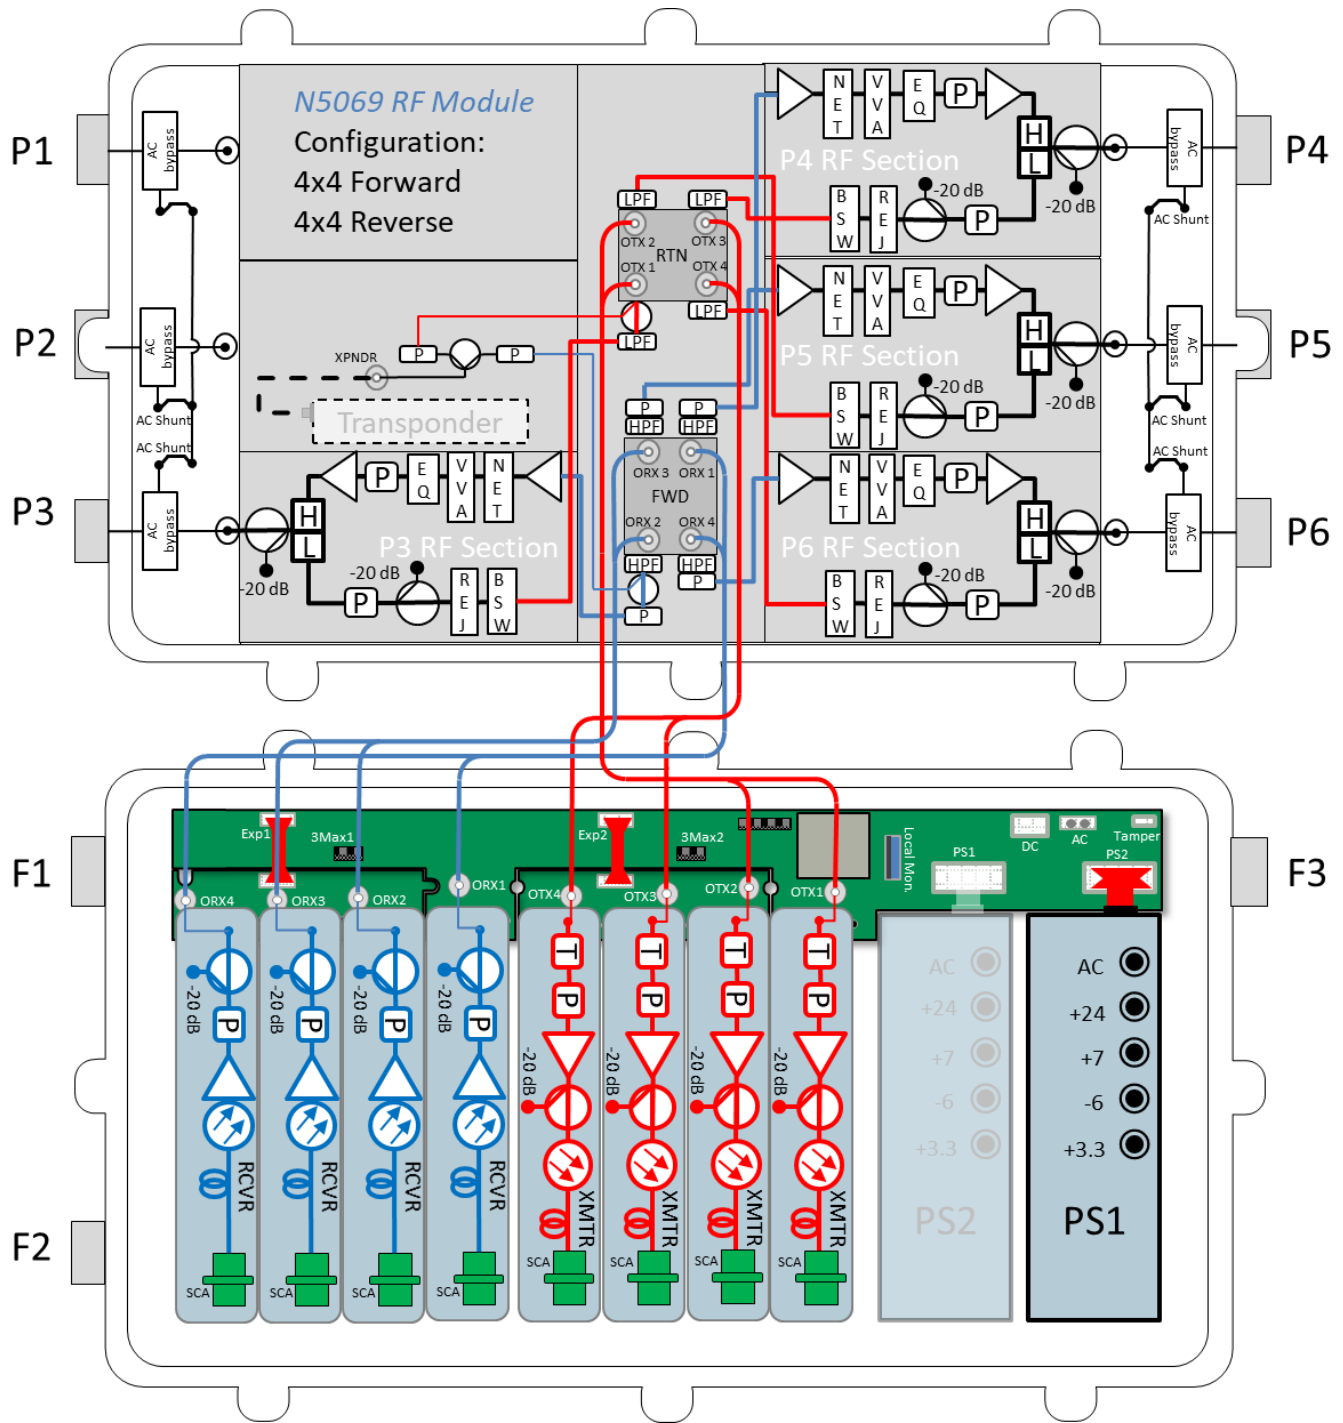

4x4 Fully Segmentable

The N5069 1.2 GHz is a 4-output 4x4 fully segmentable optical node that is capable of providing up to 59.1 dBmV output at 1218 MHz with an optical input range from -8 dBm to +2 dBm. The node can have up to four optical receivers and four optical transmitters. The N5069 is RPhy capable and is compatible with the Harmonic pebble module. The N5069 optical node is compatible with the legacy SA6940 platform so it can be directly dropped into the existing SA6940 footprint to upgrade the HFC network to 1.2GHz bandwidth without re-splicing the cable. If the existing housing must be replaced the port configuration is the same as the legacy SA6940.

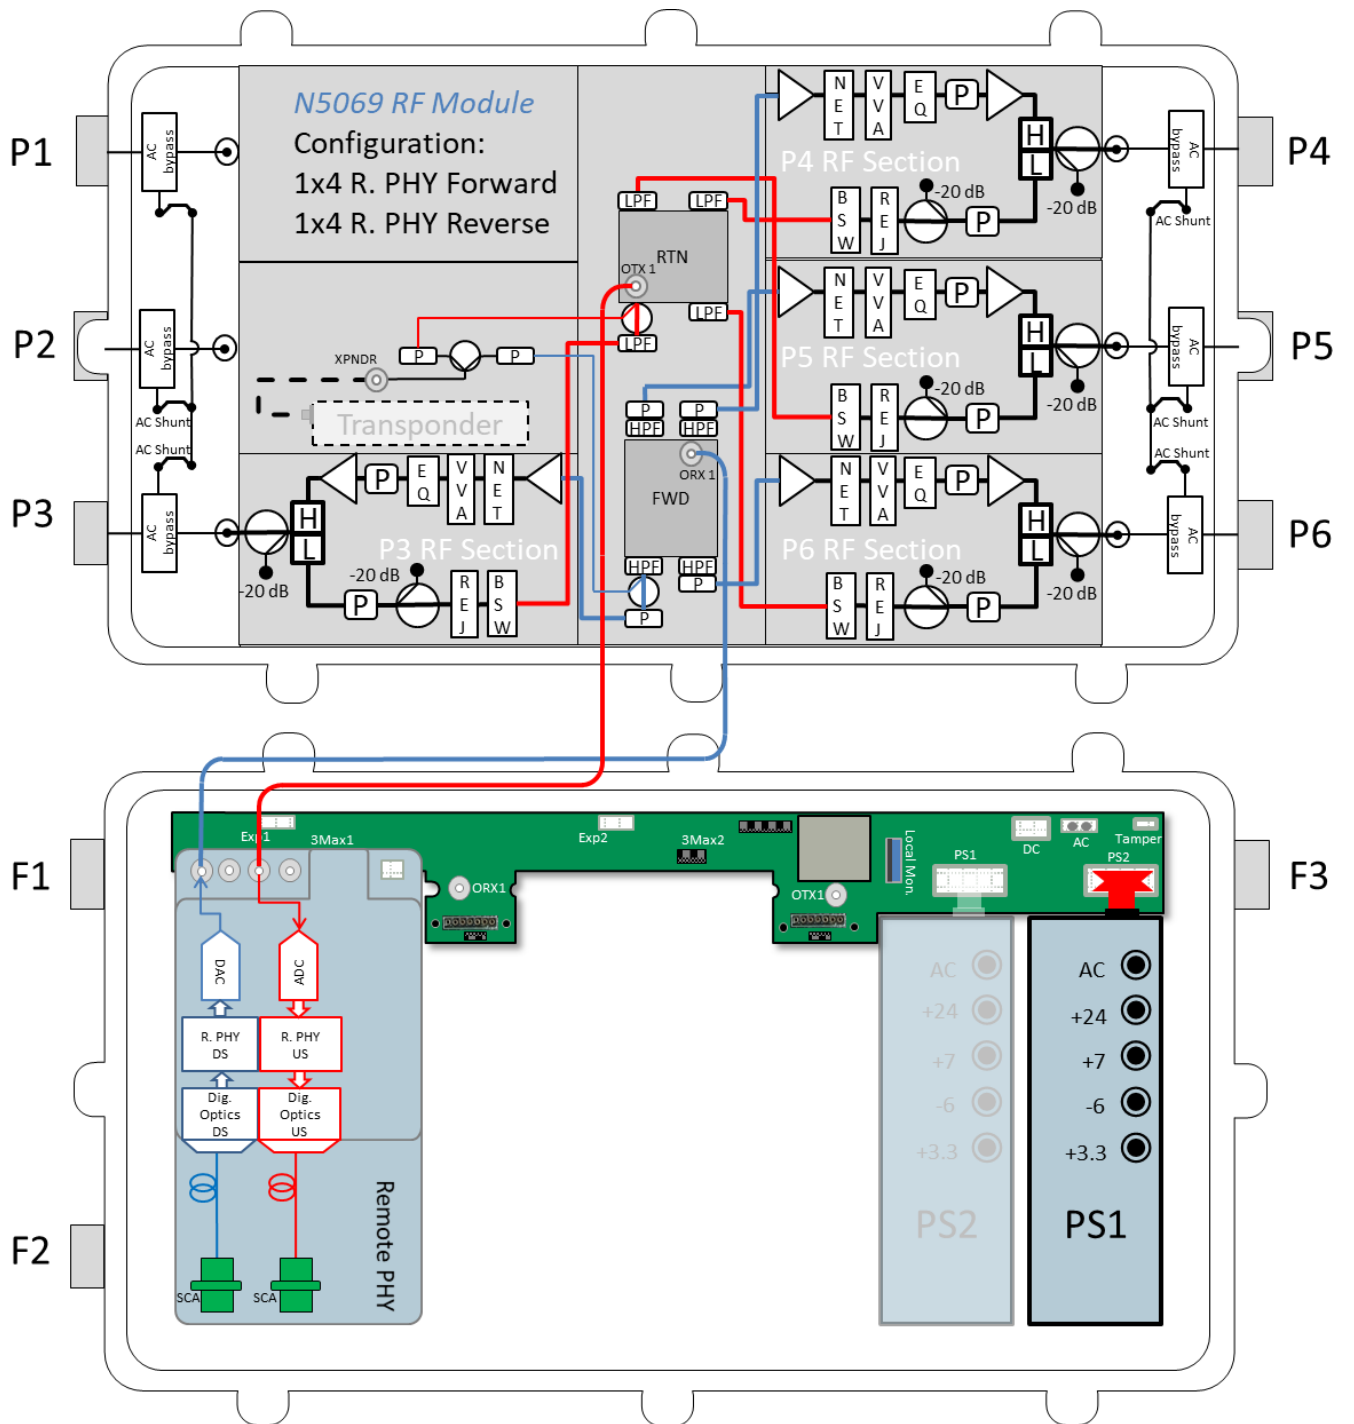

Features

- ◆ Four driven output ports
- ◆ Compact size for a 4x4 segmentable node (8.44" H x 20.22" W x 10.73" D)
- ◆ -20.0 dB directional coupler test points
- ◆ Built-in bridger switching for managing the reverse path @ 0, -3.0, -6.0, and -26.0 dB (open) with active status monitoring (optional)
- ◆ Standard push on "F" connectors can be used on all test points
- ◆ DFB, CWDM, & DWDM transmitters available
- ◆ Remote PHY module is available for digital fiber link (option)
- ◆ Plug-in forward and reverse configuration modules allows for easy field reconfiguration to add or remove segmentation as needed
- ◆ 85% efficient 40/90 VAC switch-mode power supply with built-in Triac surge protection

PART NUMBER	5	S																

3 **BASE CONFIGURATION**

A = FWD 1x4 REV 4x1 Nonsegmented
1 Transmitter installed
1 Receiver installed

C = FWD 2X2 REV 2X2 Forward & Return segmented
2 Transmitters installed
2 Receivers installed

G = FWD 4X4 REV 4X4 Forward & Return segmented
4 Transmitters installed
4 Receivers installed

L = FWD 1X4 REV 4X1 Nonsegmented (See Note 2)
1 Remote PHY 1x1 module installed (1 DS + 1US) capable

M = FWD 2X2 REV 2X2 Forward & Return Segmented (See Notes 1 & 2)
2 Remote PHY 1x1 modules installed (2 DS + 2 US) capable

N = FWD 2X2 REV4X4 Forward & Return Segmented (See Notes 1 & 2)
2 Remote PHY(1x2) modules installed (2 DS + 4 US) capable

P = FWD 1X4 REV 2X2 Forward Nonsegmented & Return Segmented (See Note 2)
1 Remote PHY(1x2) module installed (1 DS + 2 US) capable

R = FWD 2X2 REV 2X2 Forward & Return segmented Digital RPD (See Note 2)
with FWD analog RF overlay
1 Remote PHY 1x2 module installed (1 DS + 2 US) & 1 Receiver installed capable

STATUS MONITORING
0 = None
D = DOCSIS HMS Transponder

CUSTOM
0 = None
X = Determined by Product Management

NOTES:

- For Configurations with 2 Remote PHY modules 2 power supplies are required.
- For Configurations with remote PHY modules a 10GBASE SFP + single mode fiber optic transceiver submodule is needed for each RPD to establish the digital fiber link with the headend CCAP core.
- Example: 5NC4A2G20000A0EP00
2X2 Forward & Reverse segmented node, 2 Receivers, TX1: CWDM 1471nm 2mW, TX2: CWDM 1491nm 2mW, 1 Mux/Demux module DWDM1291/1293/ CWDM1471/1491nm, 1.2GHz/Slope 21dB, complete node with single power supply.

Power Consumption

Node Option	With Xponder	W/O Xponder
	Watts	Watts
4x4 Analog OTx & ORx	148	143
2x2 Analog OTx & ORx	127	122
1x4 Analog OTx & ORx	117	112
Dual RPD Node	154	154
Single RPD Node	128	128
