

AMF-L
(1 Output Line Extender)

AMF-T
(1 Trunk / 2 Bridger)

ASEM C-Cor®/Arris® Distribution Amplifiers 1002 MHz

The ACI ASEM C-Cor®/Arris® 1G RF upgrade modules are now offered with the Gallium Nitride (GaN) hybrid technology that allows for 3 dB higher output levels while maintaining close to the same specifications as the previous stations with the Gallium Arsenide (GaAs) hybrids. With this increase in the output level capabilities the cable operators are now able to extend the fiber deeper in their networks at a lower cost by reducing the number of active that are needed. The GaN hybrid technology is also extremely beneficial for use in the traditional HFC networks with the increase in station performance at the standard output levels over the GaAS hybrid stations.

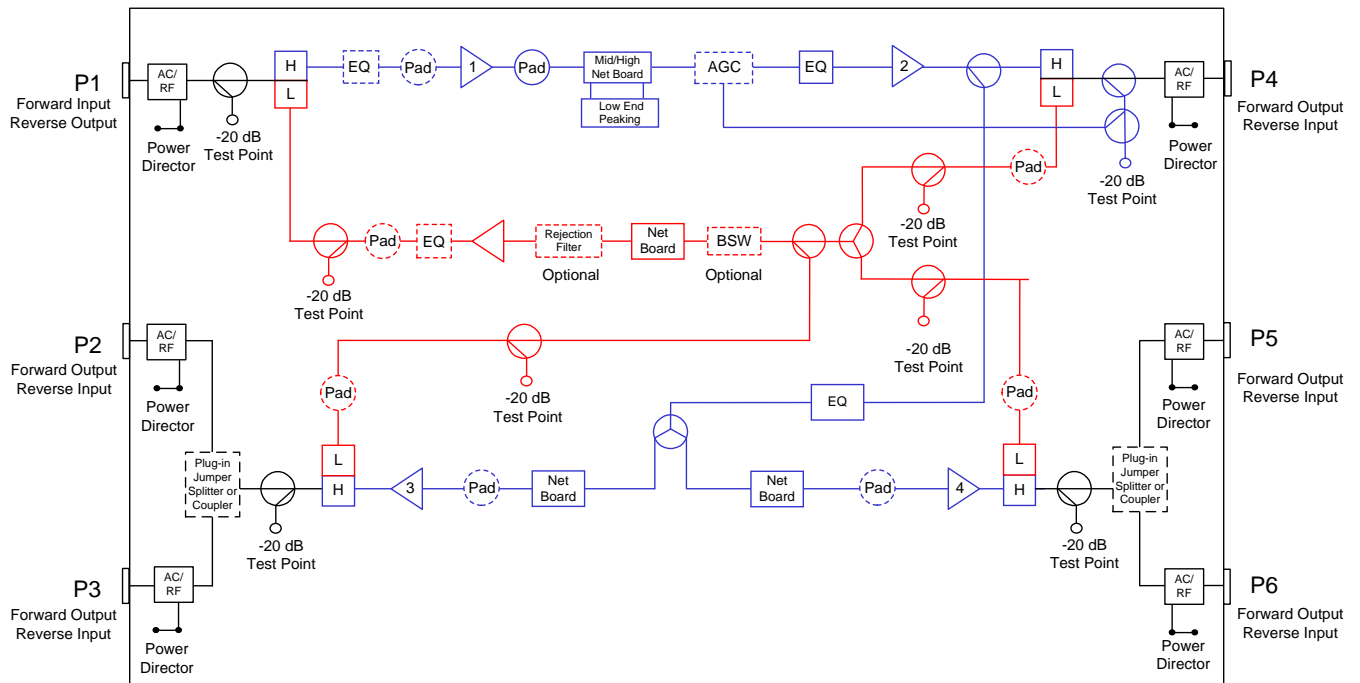

Features

- ◆ AMF-T Trunk is compatible with Arris® 901e FMT and is a 1G drop-in replacement for the C-Cor® FNT700, FNT800, FNT900
- ◆ AMF-B Bridger is compatible with Arris® 901e FMB and is a 1G drop-in replacement for the C-Cor® FNB700, FNB800, FNB900
- ◆ AMF-L Line Extender is compatible with Arris®/C-Cor® FM331e and is a 1G drop-in replacement for the C-Cor® E6 and E7 Line Extender
- ◆ Pad adjustable forward and return EQ's
- ◆ 5 to 42, 85 or 204 MHz reverse path
- ◆ Ideal for traditional HFC networks for increased performance & reliability
- ◆ Ideal for fiber deep networks with the extended reach of the amplifiers
- ◆ Patented DSIM technology (Digital AGC)
- ◆ Increased reliability with higher surge protection in the GaN hybrids
- ◆ Lower power consumption than OEM amplifiers

Notes:

1. The AMF-T & B operational gain – with AGC are based on the amplifier configured with jumper at DC/SP 3 (port 3) and DC/SP 2 (port 6) as a 2 output Bridger.
2. When using the DC/SP plug-ins SDA1G-SPLTR3.5, SDA1G-DC7, SDA1G-DC10 and SDA1G-DC12, levels will derated accordingly based on the accessory specification.

Accessory Ordering Information:

The ASEM C-Cor ordering matrix provides the part number information to order the configured stations. This page contains the ordering information for the required accessories that will be needed to make the stations functional in the field or the optional accessories that can be ordered separately.
